Inside stories

Mozzarella production in the Kropyvnytskyi region of Ukraine

In operation since 1998, Milk Masters began its foray into dairy production in 2009 and some 10 years later, acquired its own production facilities.

The Guarantee Facility enabled Milk Masters to develop its production, despite not having enough collateral and being faced with difficulties in the expansion of business.

The Guarantee Facility offered the client affordable financing and in doing so, also contributed to the manufacturing of European-standard quality products.

Thanks to the Guarantee Facility, the company increased its mozzarella production capacity by 40% from 80 to 112 tonnes. Milk Masters hopes to continue to increase this capacity even further in the coming years.
