Info

The Skills & Education Guarantee Pilot

More details available [here](#).

Investment in skills is an important policy objective of the European Commission (the EC). The Skills & Education Guarantee is a pilot initiative, which provides guarantees to bolster skills and education in Europe. The EC has teamed up with the European Investment Fund (the EIF) to deliver this programme. The EIF will partner with intermediaries such as universities, training centres and other organisations supplying education and training. By providing a partial guarantee of losses, it allows them to defer payments of educational related fees or to enter into income shared agreements and attract more students and learners to their programmes and courses.

more students and more learners

The EIF

The European Investment Fund helps small and medium sized enterprises (SMEs) grow and prosper in Europe, promoting innovation, supporting employment and improving the economy. As part of the European Investment Bank (EIB) Group, we design and deploy financial instruments, which enable banks, and funds (intermediaries) to better serve SMEs. With the Skills and Education Guarantee Pilot, we are using this expertise to partner with, amongst others, universities and other training organisations to make more financing available to students and learners.
